Theorem A: Information--safety impossibility frontier
Min. expected lost safe capacity $\mathbb{E}_1[v_1 - A(D)]$
Total variation distinguishability $d_{\mathrm{TV}}(P_0, P_1)$
Lag-2 witness: $d_{\mathrm{TV}} = 0,\ \mathrm{loss} \geq 0.323$
Safety tolerance $\beta = 0.01$
Safety tolerance $\beta = 0.05$
Safety tolerance $\beta = 0.10$
