Machine Markets

Research Paper Templates

Paper 1: Information Limits and Financial Identification

1 Abstract

2 Economic question and contribution

3 Closest results and precise distinction

4 Institution and observation contracts

5 Closed-loop model and identifiable objects

6 Identification limit: statement and proof

7 Information and financial resource costs

8 Disclosure and matched information requirements

9 Numerical witnesses and robustness

10 Empirical design and sample-use record

11 Results

12 Limitations and conclusion

Paper 2: Information Required for an Exposure Decision

1 Abstract

2 Economic question and contribution

3 Related portfolio and market-microstructure research

4 Institution, objective and available actions

5 Information sets and observation assumptions

6 Entry, holding horizon, exit and account accounting

7 Exposure bound: statement and proof

8 Confidence set and data-selected decision: statement and proof

9 Identification versus decision value: statement and proof

10 Disclosure benefit and acquisition cost

11 Baseline policies and evaluation design

12 Synthetic results

13 Market-data results

14 Misspecification and negative results

15 Economic interpretation

16 Limitations and conclusion

A Notation and time conventions

B Proofs and counterexamples

C Theorem-to-code and formalization correspondence

D Data provenance and sample-use ledger

E Additional tables and figures

F Reproduction and independent review

G References
