Harmonizing Lemma 2.6 with Dealer Balance Sheet
Peak Transient Amplification Gain $M_C$
160.0x
1.0x
Price-Only Output
C = [1, 0]
Margin Operator
C = [1, lambda/MMR]
Cross-Impact Network Spectral Inflation ($\mathcal{K}(J) \equiv 1.0$
Stability & Resolvent Metrics
Kreiss Constant $\mathcal{K}(J) = 1.00$ (Lower Bound)
Network Spectral Radius $\rho(J_{\text{network}}) \to 1.0$
Number of Cross-Impacted Assets $M$
